- (ii) **True:** According to Section 52 of the Companies Act, 2013, Securities Premium Account may be used by the company to write off preliminary expenses of the company. Thus, the accountant can use the balance in securities premium account to write off the preliminary expenses amounting ₹ 15 lakhs.
- (iii) **True:** The financial statements must disclose all the relevant and reliable information in accordance with the Full Disclosure Principle.
- (iv) **False:** In case of admission of new partner in a partnership firm, profit/loss on revaluation account is transferred to old partners in their old profit-sharing ratio.

- (vi) **False:** Debenture holder does not enjoy voting rights in company. He is only a creditor of the company.
- (b) Change in accounting policy may have a material effect on the items of financial statements. For example, cost formula used for inventory valuation is changed from weighted average to FIFO. Unless the effect of such change in accounting policy is quantified, the financial statements may not help the users of accounts.
- (c) **Calculation of depreciation for 5th year**
- Depreciation per year charged for four years = ₹ 80,00,000 / 10 = ₹ 8,00,000
- WDV of the machine at the end of fourth year = ₹ 80,00,000 – ₹ 8,00,000 × 4 = ₹ 48,00,000.
- Depreciable amount after revaluation = ₹ 48,00,000 + ₹ 3,20,000 = ₹ 51,20,000
- Remaining useful life as per previous estimate = 6 years
- Remaining useful life as per revised estimate = 8 years

Depreciation for the fifth year and onwards = ₹ 51,20,000 / 8
= ₹ 6,40,000.

Correct total depreciation expense = ₹ (2,15,000 + 1,80,000)
= 3,95,000

- (2) Wages worth ₹ 50,000 will be excluded from manufacturing account as they pertain to office and hence will be charged P&L A/c. So the revised wages amounting ₹ 3,15,000 will be shown in manufacturing account.

(c) Total Profit for 3 years = (₹ 17,000) + ₹ 50,000 + ₹ 75,000 = ₹ 1,08,000.

$$\text{Average profits} = \frac{\text{Total Profit}}{\text{No. of years}} \times \frac{₹ 1,08,000}{3} = ₹ 36,000$$

Average Profits for Goodwill = ₹ 36,000 – Proprietor Remuneration
= ₹ 36,000 – ₹ 6,000 = ₹ 30,000

Normal Profit = Interest on Capital employed
= ₹ 20,000 (i.e. ₹ 2,00,000 × 10/100) = ₹ 20,000

Super Profit = Average Profit - Normal Profit = ₹ 30,000 – ₹ 20,000

Z's Share of Profit = $1/5$

Thus Capital of the firm shall be = $2,40,000 \times 5 = 12,00,000$

X's Capital = $12,00,000 \times 5/10 = 6,00,000$ and

- (b) (i) A bill of exchange is an instrument in writing containing an unconditional order, signed by the maker, directing a certain person to pay a certain sum of money to or to the order of certain person or to the bearer of the instrument. When such an order is accepted by the drawee on the face of the order itself, it becomes a valid bill of exchange.

There are three parties to a bill of exchange:

- (i) The drawer, who draws the bill, that is, the creditor to whom the money is owing;
 - (ii) The drawee, the person to whom the bill is addressed or on whom it is drawn and who accepts the bill that is, the debtor; and
 - (iii) The payee, the person who is to receive the payment. The drawer in many cases is also the payee.
- (ii) **Retirement of bills of exchange:** Sometimes, the acceptor of a bill of exchange has spare funds much before the maturity date of the bill of exchange accepted by him. He may, therefore, desire to pay the bill before the due date. In such a circumstance, the acceptor shall ask the payee or the holder of the bill to accept cash before the maturity date. If the payee agrees, the acceptor may be allowed a rebate or discount on such early payment. This rebate is generally the interest at an agreed rate for the period between the date of payment and date of maturity. The interest/rebate/discount becomes the income of the acceptor and expense of the payee. It is a consideration for premature payment. When a bill is paid before due date, it is said to be retired under rebate.

The basic considerations in distinction between capital and revenue expenditures are:

- (i) Nature of business: For a trader dealing in furniture, purchase of furniture is revenue expenditure but for any other trade, the purchase of furniture should be treated as capital expenditure and shown in the balance sheet as asset.
- (ii) Recurring nature of expenditure: If the frequency of an expense is quite often in an accounting year then it is said to be an expenditure of revenue nature while non-recurring expenditure is infrequent in nature and do not occur often in an accounting year.
- (iii) Purpose of expenses: Expenses for repairs of machine may be incurred in course of normal maintenance of the asset. Such expenses are revenue in nature. On the other hand, expenditure incurred for major repair of the asset so as to increase its productive capacity is capital in nature.
- (iv) Materiality of the amount involved: Relative proportion of the amount involved is another important consideration in distinction between revenue and capital.
